BACK PANEL

Connecting SecuraNET EM

Ethernet connection

1. Connect the SecuraNET EM Appliance's 'Port 1' to a management computer's Ethernet interface.

Use a cross-over Ethernet cable to connect the devices directly or use straight-through Ethernet cable to connect the devices through a hub or switch.

2. Change the IP address of the management computer to 192.168.0.2 and the subnet mask to 255.255.255.0.

From the management computer

1. Browse to <https://192.168.0.1>
2. Log on to the SecuraNET EM web admin console using default Username 'admin' and Password 'firewall'.
3. Click the configuration wizard button to launch the configuration wizard.

Prerequisite

Ethernet connection between management computer and SecuraNET EM.

Configuring the SecuraNET EM Appliance

Form the configuration wizard you set the domain name, system name, local IP address, local subnet mast, WAN IP address, WAN subnet mast, WAN gateway IP address, DNS IP Address.

IP Address : 192.168.0.81

Subnet Mask : 255.255.255.0

Configure WAN Interface (PORT #3 of UTM)

IP Address : 61.17.211.110

Subnet Mask : 255.255.255.0

Gateway IP : 61.17.211.1

DNS Address :

Save

Cancel

After the configuration you put the SecuraNET EM appliance to your gateway mode.

This finish the basic configuration of SecuraNET EM and you are now ready to use the Appliance.

WHAT NEXT?

1. Access SecuraNET web admin console.

Browse to <https://<IP address of SecuraNET EM>> and log on using the default username (admin) and password (firewall).

2. Now take the user guide of SecuraNET EM and configure the SecuraNET EM as per the requirement.

Service and Support

No Internet security solution is complete without systematic updates and security intelligence. From the latest hacker techniques to the most recently discovered operating system bug, the daily barrage of new threats poses a perpetual challenge to any network security solutions.

In addition, the Bulwark's Technical Support team and Training department offer a wide variety of methods to answer your questions and assist you with improving the security of your network.

As the frequency of new attacks and security advisories continues to surge, the task of ensuring that your network is secure becomes an even greater challenge. The Bulwark System's Rapid Response Team, a dedicated group of network security experts, helps absorb this burden by monitoring the Internet security landscape for you in order to identify new threats as they emerge.

Threat alerts and expert advice

After a new threat is identified, you'll receive a Security broadcast by way of an email message from our Rapid Response Team that alerts you to the threat. Each alert includes a complete description of the nature and severity of the threat, the risks it poses, and what steps you should take to make sure your network remains continuously protected.

Easy software updates

Your subscription saves you time by providing the latest software to keep your SecuraNET EM System up-to-date. You receive installation wizards and release notes with each software update for easy installation. These ongoing updates ensure that your SecuraNET EM System remains state-of-the-art, without you having to take time to track new releases.

Access to technical support and training

When you have questions about your SecuraNET EM system, you can quickly find answers using our extensive online support resources, or by talking directly to one of our support representatives. In addition, you can access SecuraNET courseware online to learn about SecuraNET system

Assisted Support

Bulwark Systems offers a variety of technical support services for your SecuraNET EM products. Several support programs, described throughout this section, are available through Bulwark's Technical Support. For summary of the current technical support services offered by Bulwark's Systems, please refer to the Bulwark's Web site at:
